

D SERIES

Circular Plastic Connectors

HYPERBOLOID TECHNOLOGY

Smiths Connectors offers an extensive range of superior contact technologies suitable for standard and custom solutions. Hypertac® (HYPERboloid conTACT) is the original superior performing hyperboloid contact technology designed for use in all applications and in harsh and demanding environments where high reliability and safety are critical. The inherent electrical and mechanical characteristics of the Hypertac hyperboloid contact ensures unrivalled performance in terms of reliability, number of mating cycles, low contact force and minimal contact resistance. The shape of the contact sleeve is formed by hyperbolically arranged contact wires, which align themselves elastically as contact lines around the pin, providing a number of linear contact paths.

FEATURES

LOW INSERTION/EXTRACTION FORCES

The angle of the socket wires allows tight control of the pin insertion and extraction forces. The spring wires are smoothly deflected to make line contact with the pin.

LONG CONTACT LIFE

The smooth and light wiping action minimizes wear on the contact surfaces. Contacts perform up to 100,000 insertion/extraction cycles with little degradation in performance.

LOWER CONTACT RESISTANCE

The design provides a far greater contact area and the wiping action of the wires insures a clean and polished contact surface. Our contact technology has half the resistance of conventional contact designs.

HIGHER CURRENT RATINGS

The design parameters of the contact (e.g., the number, diameter and angle of the wires) may be modified for any requirement. The number of wires can be increased so the contact area is distributed over a larger surface. Thus, the high current carried by each wire because of its intimate line contact, can be multiplied many times.

IMMUNITY TO SHOCK & VIBRATION

The low mass and resultant low inertia of the wires enable them to follow the most abrupt or extreme excursions of the pin without loss of contact. The contact area extends 360 degrees around the pin and is uniform over its entire length. The 3 dimensional symmetry of the Hypertac contact design guarantees electrical continuity in all circumstances.

BENEFITS

HIGH DENSITY INTERCONNECT SYSTEMS

Significant reductions in size and weight of sub-system designs. No additional hardware is required to overcome mating and unmating forces.

LOW COST OF OWNERSHIP

The Hypertac contact technology will surpass most product requirements, thus eliminating the burden and cost of having to replace the connector or the entire subsystem.

LOW POWER CONSUMPTION

The lower contact resistance of our technology results in a lower voltage drop across the connector reducing the power consumption and heat generation within the system.

MAXIMUM CONTACT PERFORMANCE

The lower contact resistance of the Hypertac contact reduces heat build-up; therefore Hypertac contacts are able to handle far greater current in smaller contact assemblies without the detrimental effects of high temperature.

RELIABILITY UNDER HARSH ENVIRONMENTS

Harsh environmental conditions require connectors that will sustain their electrical integrity even under the most demanding conditions such as shock and vibration. The Hypertac contact provides unmatched stability in demanding environments when failure is not an option.

▶ How to Order:

 Standard D Series13

 D02 Series (Power or Coax & Signal)14

▶ Smiths Connectors Product Lines.....15

FEATURES

- ▶ Push-button latching feature
- ▶ Available in 3 standard sizes: Mini D00, D01 and D02
- ▶ D-shaped housings
- ▶ Hybrid signal, power and coaxial contact technologies available
- ▶ Designed for critical medical applications
- ▶ Fixed and in-line receptacles available
- ▶ Housing alignment and polarization
- ▶ Custom cable assemblies available
- ▶ Crimp contacts shipped unloaded

BENEFITS

- ▶ Quick connect – simple one-hand mating/unmating
- ▶ Standard stocked connectors offered with 3 to 25 contacts
- ▶ Visually intuitive mating
- ▶ Design flexibility allowing multiple contact technologies within a single connector solution
- ▶ Provides high reliability in a cost effective package
- ▶ Easy incorporation into box and extension cable designs
- ▶ Designed to prevent mismating
- ▶ Complete system solutions reduce logistic and sourcing costs
- ▶ Easier termination for reduced cost of ownership: crimp and poke termination eliminates the need to pre-tin, solder or shrink boot

D SERIES CONNECTORS

Smiths Connectors' intuitive and durable D Series is recognized for its ease of use and high reliability. The D Series delivers industry-leading performance featuring simple push-button latching and a "D" shaped flange which makes mating orientation obvious.

There are three D Series sizes that accommodate a wide variety of applications. The D01 plug is available with up to nine Hypertac® hyperboloid contacts in less than 1/2" diameter, while the slightly larger D02 offers more extensive options, from three power to 25 signal contacts, or a mixture of power or coax and signal contacts. In addition, the mini D00 connector includes five signal contacts in a format nearly 30% smaller than the D01.

The D Series provides medical equipment designers with reliable connections for applications as diverse as electrophysiology catheters, patient monitors, MRIs, intravascular ultrasounds, defibrillators, infusion pumps and laboratory equipment. D Series connectors are also used in a variety of industrial and commercial applications where reliability is critical.

Cable assemblies are also offered, incorporating the D Series with overmoulding, integrated electronics, metal shells for increased strength, or alternate contact configurations to meet specific customer requirements.

GENERAL SPECIFICATIONS

Contact Arrangements & Technical Characteristics

► **MINI D00 SERIES**

Standard

Receptacle seen from mating face

Number of Contacts	5
Contact Diameter	0.012 [0.30]
Termination Style	Crimp (pin & socket) 26 to 28 AWG

MATERIALS & FINISHES

Insulator	Polyetherimide
Socket	Beryllium copper wires and brass body
Pin	Phosphor bronze
Mating Surface Plating	Gold over nickel

ELECTRICAL

Current Rating	1.0 A
Contact Resistance	< 6.7 milliohms
Breakdown Voltage Between Contacts	1000 V min.
DWV	750 V
Insulation Resistance	> 10 ³ megohms at 500 VDC

MECHANICAL AND ENVIRONMENTAL

Contact Mating Cycle Life	Up to 100,000
Extraction Force	0.35 to 1.60 oz. per contact
Operating Temperature Rating	-40° to 125° C

ACCESSORIES

Crimp Tool	AFM8 or M22520/2-01
Positioner	K1775
Insertion Tool	T2080

SMITHS CONNECTORS PRODUCT LINES

Circular

- ▶ Metal and plastic
- ▶ Industrial M12, M23, M40, M58
- ▶ Crimp and solder terminations
- ▶ Push/pull latch mechanism
- ▶ Colour coding

EMI / EMP Filter

- ▶ EMI/RFI filtering and transient protection
- ▶ RoHS compliant solderless filter connectors available
- ▶ Filtered adapter for "bolt on" EMI/EMP solutions
- ▶ Filter hybrid capability
- ▶ Circular, ARINC, D-Subminiature, Micro-D

Heavy Duty

- ▶ Modular solution: signal, power, data contacts and fibre optics
- ▶ EMC shielding
- ▶ High pressure up to 35K PSI, 250°C
- ▶ High temperature up to 440°C

High Power

- ▶ Single and multi-way
- ▶ Circular and configurable rectangular
- ▶ Power contact up to 1,200 Amps
- ▶ Excellent performance in harsh environments

High Speed Copper / Fibre

- ▶ Quadrx and Twinax connectors
- ▶ Fibre Optic Butt Joint, Expanded Beam and Floating Fibre Termini available
- ▶ ARINC and MIL-STD contacts

Mil / Aero Standards

- ▶ Standard military interface
- ▶ ARINC 801
- ▶ ARINC interface
- ▶ Custom inserts

Modular / Rectangular

- ▶ Configurable modules for signal, power, coax, fibre optic and/or pneumatics
- ▶ Guided hardware for blind mating
- ▶ Easy configuration in a single frame
- ▶ For rack & panel and cable applications

PCB

- ▶ Low, medium and high density board-to-board, cable to board and stacking
- ▶ Signal, power, coax and high speed configurations
- ▶ Numerous termination styles

Spring Probe

- ▶ Z-axis compliant
- ▶ Blind mate engagement
- ▶ High density
- ▶ Extreme miniaturization
- ▶ High reliability, multi-cycle performance
