The LSH rack and panel connector from Smiths Connectors is deployed across many different market segments including aerospace, automotive, industrial, test & measurement, and mass transit. The foundation upon which the LSH is built is the leading-edge Hypertac® hyperboloid technology. This world class interconnect technology ensures LSH connectors are immune to shock, vibration and fretting. In addition, it features the low insertion and extraction forces that are a catalyst for easy mating. The LSH Series delivers customers a life cycle that can be maintained for 100,000+ mating cycles and at an extremely low cost of ownership.
